MYSQL

PROFESSIONAL EXPERIENCE

TOSS Developer

April 2023-Aug 2024

As a Java Developer at TOSS, my primary responsibilities involve designing and implementing scalable Java-based solutions to enhance operational efficiency and service delivery. I collaborate with cross-functional teams to gather requirements, develop server-side logic, and create user-friendly interfaces that improve both client and internal team experiences. My role includes optimizing database queries and structures to reduce retrieval time, ensuring seamless integration with relational databases like MySQL, and enhancing system scalability to handle increased client demands

- Developed and maintained scalable Java-based applications using Spring Boot and Hibernate.
- Built RESTful and SOAP web services for integration with third-party services.
- Optimized data handling with Oracle and SQL databases for high-volume transactions.
- Collaborated with product managers and architects to define technical scope and delivery timelines.
- Worked on version control using Git and SVN in CI/CD environments.

PROJECT

REJUVENATE: A SKIN CARE WEBSITE

A MERN stack-based skin care website that provides us with consultancy and products for skin care.

CERTIFICATES

Introduction to Cybersecurity, Cisco

(03/2022 - 07/2020)

IT Academy: Cloud and Virtualization Concepts,

VMware (07/2022 - 08/2022)

Essential Google Cloud Infrastructure Foundation

(03/2022 - 04/2022)

Google Cloud Fundamentals: Core Infrastructure

(03/2022 - 04/2022)

EDUCATION

Noida Institute of Engineering and Technology(NIET)

Bachelor of Technology

Aug 2019 - July2023
